Personal Projects

- CrickInformation**- A full stack web-based project that allows us to view all information, including the score for international cricket in real time. Java, HTML, CSS, and JavaScript were employed as languages. I made use of MySQL for the database, Spring Boot and Hibernate for the backend, Angular JS for the frontend, and Web Scraping for obtaining data from another website.
- Heaven-hub** - a web-based, full stack e-commerce project. MySQL, JavaScript, HTML, Tailwind CSS, and Java were the languages used. Technology included Angular JS, Hibernate, and Spring Boot.

Project Features:

- Product Carousel & Filtering:** Engaging UI elements that allow Users to browse products seamlessly.
- Sorting & Pagination:** Implement easy navigation for product exploration.
- Product Details Page:** Provide in depth information to aid customer decision making.
- Cart & Checkout Flow:** Enable smooth adding to cart, order creation, and payment processing.
- Razorpay Integration:** Showcase integration of a popular payment gateway.
- Order Tracking & History:** Implement order tracking & view order history functionalities.
- Admin Management:** Admin capabilities include order management, product control and customer insights.
