## PERSONAL PROJECT

- **Bank ATM System:** - This is a Desktop base application. In this project I specially use Java SWING for GUI and My SQL workbench as database. I simply use java language to connect with database. Here I try to represent how an ATM machine work with different transactions.
- **University Management System:** - Another Desktop based application with SWING, My SQL Workbench which represent how manage the administrative section in any University. How they add, delete the students and teachers. How they publish results etc.
- **Apple leaf Disease Classification:** - This is a Deep Learning based project using python, TensorFlow. It is an apple leaf disease classification project where we train 8 CNN (Convolutional Neural Network) based models with 3 optimizers to classify and detect the apple leaf disease by providing the image of the leaf.
